GOVERNMENT HOUSE TRIP

YEARS 1 AND 2

Aft and Lower Deck went to Government House
on Wednesday 16th August. All of the students
and parents got to make their own crowns. Both
classes were shown around Government House
giving them the chance to see the Ballroom with
its amazing chandeliers. These chandeliers only
get cleaned every 4 years as it takes 2 people 3
days to clean them.

The carpet in the reception area is so thick
that they can shave it every 4 years to keep it clean and new.

ILLNESSES

"Slapped Cheek" most commonly affects children under 10 years of age. Some adults may get it if they are not immune from childhood. How is slapped cheek spread? Slapped cheek is caused by the human parvovirus B19 (no connection to the animal parvovirus). Slapped cheek is passed on in droplets from the respiratory tract of an infected person, mainly by close contact, coughing and sneezing. Once infected the time until symptoms appear is between 4 and 20 days. If you catch slapped cheek, you'll be infectious for 5 or 6 days before the first symptom appears. You'll stop being infectious once the rash appears. Slapped cheek rapidly spreads through schools and childcare facilities and is most common during winter and spring.
